

MARINE WINDOWS & SLIDING DOORS

FEHRMANN stands for 115 years of experience in engineering and production of specialized windows, electrical glass doors and turnkey solutions like glazed gyms with extendable roofs on megayachts. The FEHRMANN organization is managed by its proprietors and enjoys a world-wide reputation for the excellence of its products.

This traditional Hamburg-based company has experienced eventful times since it was founded in 1895. The company originally specialized in spare parts for the North German shipyards, but soon expanded production to include heavy duty windows for shipbuilding and plant manufacture. Today this medium-sized enterprise, led by the fifth generation of the family, is renowned for its innovative engineering achievements and tailor-made products that meet the most exacting requirements of our clients. State-of-the-art technology combines with long years of experience and skilled craftsmanship among the 50 strong specialist workforces. Together they ensure a level of performance that for decades now has satisfied, and continues to satisfy, customers worldwide. Excellent testimonials attest to this confidence in Fehrmann products.

Heavy Duty Ship Windows & Sliding Glass Doors

We develop and produce every type of window and glass door to ISO standard, or to meet the individual requirements of clients.

Our newly developed glass sliding doors for mega yachts combine innovation with the need of comfort i.e. opening in less than 10 seconds and highest safety requirements that even meet future requirements like watertightness or no use of inflatable seals.

We take into account the latest scientific and technical knowledge in manufacturing and developing our solutions. We also cooperate with well-known institutes and companies.

Windows and Sliding Doors:

- Flat or curved (2D and 3D)
- Fire-resistant (windows A0 to A60)
- Bulletproof (all categories)
- Explosion proof and anti-bombardment
- Soundproof windows
- With EMS function (EMI, EMC, RCS)
- Complete glazing's
- Customized constructions out of metal and glass
- Manually or electrically operated
- Without inflatable seals
- PLC control, Ethernet ready
- Secured against heeling
- Ready-to-install interface

NEW Flushline Sliding Door System

More Freedom to Design

We respect this! Our brand-new sliding doors hide completely in the wall while closed to be flushline with the wall. Whether single-leaf or double-leaf sliding, fully glazed, curved, or even 3D shaped our approach is to provide you more freedom to design.

Safety included

We are proud to have close relationships to all major class societies. All necessary functions are still maintained according to existing rules, and we exceed many requirements to extend our lead in innovation.

- Heeling up to 25°
- Without use of inflatable seals
- Double crush protection strips
- Dead easy manual unlocking in case of an emergency

Comfort counts

Electronics on board become more and more an issue to enhance the Owner's comfort. With our Ethernet ready PLC control all options can easily be set and controlled locally and through the main electronic system.

- Touch panels
- Designed and reliable radar sensors
- Dimmed lights or light shows at windows and glazed doors
- Adjustable light transmission
